

## TRACK AND ATHLETIC EVENTS DEVELOP INTERESTING GOSSIP

(By Associated Press.)

SAN FRANCISCO, June 10. — Ted Meredith, the University of Pennsylvania track captain and star of the recent intercollegiate meet at Cambridge, evidently is a close student of the ability of his contemporaries and rivals in athletics. A few days before the meet Meredith ventured a forecast of the probable performances of the Stanford and University of California athletes. The results as compared to his forecasts are worthy of record.

Meredith predicted that Stanford would finish in second place and California tied for third place. He gave Stanford 29 points and California, The two scored 22 points each.

The Pennsylvanian picked Murray of Stanford to win in both hurdle events. He did. He conceded Capt. Preble of California second place in the high hurdles. Preble placed third. In both hurdles he placed Norton of Stanford third. Norton ran third and fourth.

The best he would accord Wilson of Stanford in the mile was third place while the popular verdict accorded him a great chance of being returned victor. Wilson finished in fourth place.

He conceded the hammer throw to Gildersleeve of California who won it. In the broad jump he accorded second place to Maker of California and third place to Slison of Stanford. They finished in fourth and third place respectively.

Followers of track and field athletics were delighted to learn of the decision of the Olympic club officials to send a team to the Amateur Athletic union's annual national track and field championships held in Newark, N. J., on September 9.

The Olympic club has been the Pacific coast's leading representative in national competition for many years, having sent teams to Jamestown, St. Louis, Chicago, Seattle, Portland, Pittsburgh and other places where the nation's best athletes were congregated for competition.

While it will be some time before the personnel of the team is made up, there is no doubt that the "Winged O" representatives will present a formidable lineup. Among those on the roster of its athletes and who will be eligible to make the trip are such nationally well known performers as Fred Murray, All-American collegiate

hurdling champion; Riversedge, University of California star weight thrower; Meredith House of Stanford coast record holder for the low hurdles; Paul Wilson who recently ran the mile for Stanford in 4:19 in the dual meet against the University of Michigan and Edgar Stout and Oliver Millard, the best of the long distance runners of the coast.

The world famous tennis combination of "McLoughlin and Bunday" synonymous of unbeatableness and national championships in the pace, is likely to be no more and the partnership dissolved.

Such at least is the word that comes from Los Angeles where the two tennis stars are engaged in a business partnership and the ultimatum is credited to no less an authority than McLoughlin himself. The close application required by their business interests will prevent Bunday from going east this summer and McLoughlin is not at all sure that he will be able to get away for participation even in the singles tournaments.

### WATCH THE COOLING SYSTEM IS ADVICE OF NEW PAMPHLET

"Some cooling systems are so closely proportioned that the storage of the fan, or sediment in the water jackets or radiator will cause the engine to overheat and the water in the radiator to boil," says the Mechanical Bulletin No. 3, entitled "Engine Over-Over-Over."

"Care should be taken to see that the hose used for radiator connections has not rotted and small particles of rubber have not gotten into the cooling system, also that the formation of scale and sediment in the water jackets is not so serious as to impair radiation."

"A very effective method of removing sediment and particles of foreign matter from the cooling system, is to fill the radiator with boiling water in

## The Chandler Leads in Price and Style and Certainty of Service

NEVER before has the Chandler leadership been so obvious to so many people as it is now, at the height of the 1916 season.

At a time when so many cars are "marked up" a hundred dollars or more, the Chandler leads with the same low price established eighteen months ago.

In the midst of a horde of new types and styles of engines, "The Marvelous Motor" leads in certainty of service. Built in the Chandler factory ever since the first Chandler car was marketed this famous motor,—refined, more powerful, more flexible,—still leads most distinctly because free from any hint of experimentation or uncertain theory.

And Chandler leads quite as clearly in beauty of body design, refinement of finish in every detail and luxury of upholstery.

It is not surprising that many thousands of new owners have joined the Chandler ranks this year.

You will be delighted with your Chandler
